NATIONAL GEOGRAPHIC SOCIETY

WASHINGTON, D. C.

75TH ANNIVERSARY

1888–1963

Organized "for the increase and diffusion of geographic knowledge"

The National Geographic Society is chartered in Washington, D. C., in accordance with the laws of the United States, as a nonprofit scientific and educational organization for increasing and diffusing geographic knowledge and promoting research and exploration.

Since 1890 the Society has supported more than 200 explorations and research projects, adding immeasurably to man's knowledge of earth, sea, and sky. It diffuses this knowledge through its journal, NATIONAL GEOGRAPHIC; more than 23 million maps distributed each year; its books, globes, and atlases; 30 School Bulletins a year in color; information services to press, radio, and television; and the publication of technical monographs.

Articles and photographs of travel, natural history, and expeditions to far places are desired. For material used, generous remuneration is made.
